***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, claims 1-15, directed to a system with an energy analysis module to establish energy performance of the electric motor;

Species II, claims 16-41, 44-47, and 56-65, directed to a system and method with a motor estimation module to establish estimated values of a plurality of electrical parameters of an electric motor;

Species III, claims 42, 43, and 48-55, directed to a system and method with means for establishing comparison criteria between the electric motor and an alternative motor.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Nghiem whose telephone number is (571) 272-2277. The examiner can normally be reached on M-H.
